

## Reliable communication at sea

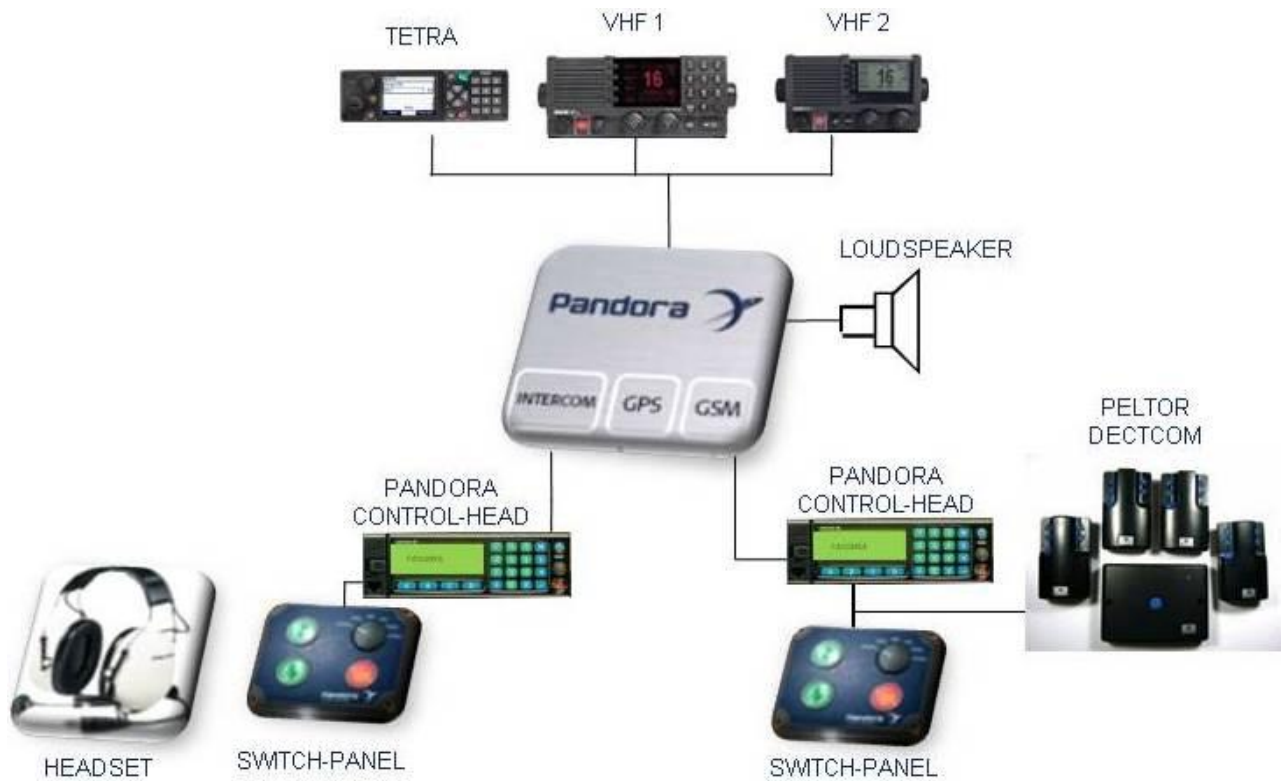

Extreme conditions places high demands on the communication system onboard. Both driver and navigator needs to be able to communicate with each other as well as emergency dispatcher, coastguard, police and other boats or aircrafts throught different radio systems. All radiosystems are connected to Telium Pandora that has a built in GSM-module and provides intercom functionality.

With the extremely robust and easy to use switch-panel the user quickly and precicely selects which system they wish to use at any given moment.

Telium Pandoras flexible platform and ease of use are a perfect combination to offer systems in different sizes and customized for each user's specific communication needs.
